

**ABSTRACT**

5 A ceiling fan is disclosed having a motor (14), a  
radial array of fan blades (16) coupled to blade irons  
(18) mounted to the motor (14), a translucent motor  
housing (24), and a frame (20) positioned concentrically  
around the motor housing (24). The frame (20) and motor  
housing (24) connect to a plate (32) having a series of  
light sources (40) mounted to the plate (32) inboard of  
the motor housing (24) to illuminate the motor housing  
10 (24).
